

WR-PRG - Pronamic® Rain Gauge

The WR-PRG is the ideal accessory to a WR7 Weather Reach Receiver™. This self-emptying, frost proof electronic rain gauge accurately measures rain to 1mm per tip helping to ensure your landscape is not over watered because of rain.

Rain is measured as it runs through a funnel at the top of the rain collector into a self-emptying spoon. The spoon automatically tips and is emptied as soon as a millimeter of rain is collected.

The WR-PRG is durable and weatherproof resisting the sun's UV radiation and extreme frost and heat temperatures.

Measurements are accurate to 1mm per tip, and have a maximum deviation of +/- 2%.

A 30' cable is included with the gauge.

WR-OE – Weather Reach Outdoor Enclosure

Protect your WR7 Weather Reach Receiver with proven security. The WR-OE Weather Reach Outdoor Enclosure is an industrial strength, lockable fiberglass NEMA 4X cabinet with a 110 VAC outlet. It is weather resistant, with stainless steel exterior hardware. The internal mounting plate is pre-drilled so your Weather Reach Receiver will fit just right.

Dimensions: 11^{5/8}" H x 9^{1/2}" W x 4^{1/4}" D

WR-ANT-B – Weather Reach Receiver External Antenna – BNC - Female

Add the WR-ANT-B external antenna to your Weather Reach Receiver to assure your receiver receives every signal transmitted for peak performance. Due to unavoidable obstacles in some areas an external antenna may be needed. Antenna Cable (not included) 50 Ohm with BNC Male connectors. For installations with cable lengths up to 25' use cable size RG-58 or greater than 25' use cable size RG-8.

WR-PS - 110 VAC Plug-in Power Supply

The WR7 Weather Reach Receiver can use power from a controller's 24 VAC power supply. If needed a WR-PS plug-in power supply will furnish the needed power for a Weather Reach Receiver.

WR-7 AK – Weather Reach WR-7 Activation Kit

The Weather Reach WR-7 Activation Kit is a necessary tool for every professional. The WR-7 Activation Kit will enable you to activate a Weather Reach Receiver with the correct settings using your own computer. The kit includes the activation software for a PC, one DB9 RJ45 cable, a Weather Reach power supply and an activation kit user guide to help you with every step of the process.
