FOR IMMEDIATE RELEASE

RAIN BIRD PARTNERS WITH IRRISOFT, INC. FOR WATER EFFICIENT SOLUTIONS

GLENDORA, Calif. (November 6, 2005) – Rain Bird Corporation has joined forces with Irrisoft, Inc., to offer weather-based solutions that will enable both homeowners and commercial water users to dramatically decrease water use for irrigation.

“Rain Bird has a longstanding relationship with Irrisoft and its parent company, Campbell Scientific, Inc., and we are certain that together we will be able to offer the market the most effective ET-based water-savings irrigation solutions,” said Ron Wolfarth, director of Rain Bird’s landscape irrigation division. “Rain Bird has pioneered for more than two decades the use of weather technology in the golf and commercial irrigation markets with our central control products. We are now confident that we will have a high-quality product to meet the needs of the residential and commercial irrigation markets.”

This relationship further demonstrates Rain Bird’s commitment to The Intelligent Use of Water™, which extends beyond its water efficient product offerings to education, training and services for the irrigation industry and its communities.

The Rain Bird® ET Manager™ is designed to make commercial and residential irrigation controllers smarter by enabling automatic weather-based adjustment to watering schedules. The ET Manager will incorporate the most complete range of weather data, updated hourly, to allow controllers to operate in the most water-efficient manner possible.
